

We need a national dialogue on this issue, better data and better analysis. We need to include congress, the FCC, the media (who have remained silent so far and unfortunately it is in their interest to do so) and all America. We need to slow down and make sure we do not create an even more concentrated media oligarchy than exists today - where a handful of large multi-national corporations own most of our media - film, tv, newspapers, magazines, etc. We need more diversity, less concentration, and more silent voices being heard.

Thank You
